Summary

Software Engineer specializing in Flutter & Dart, currently contributing to MySA — an AI-Personal assistant product. MCA graduate (2025) with a solid technical foundation and a growth mindset, focused on building impactful, production-ready mobile applications.

Education

SRM Institute of Science and Technology Master of Computer Applications (MCA)	June 2023 - April 2025 9.34 CGPA
Chaudhary Charan Singh University Bachelor of Science (B.Sc)	July 2018 - June 2021 64.65%
UP Board Senior Secondary (12th Grade)	July 2017 - June 2018 83%

Technical Skills

Languages: Dart, Java, JavaScript, PHP (Core), SQL
Mobile: Flutter, Android Development
Frontend: HTML, CSS, React.js
Game Dev: LibGDX, Scene2D
Tools: Git, GitHub, Terminal, Java (Swing)

Experience

Witzeal Technologies Private Limited Software Engineer Project: <i>MySA – AI-Personal Assistant</i> ◊ Actively developing and maintaining MySA, an AI-Personal assistant product, using Flutter & Dart. ◊ Building responsive, production-ready UI components and integrating AI-driven features into the mobile application. ◊ Collaborating on full product development cycles including feature implementation, testing, and iteration. Technologies: Flutter, Dart	January 2026 – Present
Witzeal Technologies Private Limited Software Engineer Trainee Projects: <i>Cards21 (Card Game) & MySA (AI Assistant)</i> ◊ Developed Cards21, a fully functional card game built with LibGDX framework in Java, handling game logic, UI, and user interactions. ◊ Simultaneously contributed to the MySA AI assistant product during training, gaining early hands-on experience with Flutter & Dart in a production environment. ◊ Demonstrated fast learning ability by transitioning from game development to mobile app development within the same training period. Technologies: Java, LibGDX, Flutter, Dart	July 2025 – January 2026

Projects

Cards21 – Card Game A feature-rich card game built with LibGDX framework, featuring dynamic gameplay mechanics and server-side integration. – Tools & technologies used: Java, LibGDX, Scene2D ◊ Designed and developed a fully functional card game using LibGDX framework with Scene2D for building interactive and responsive UI scenes. ◊ Implemented core game logic in Java including card mechanics, a 3-life system, and an Extra Life feature allowing players to extend gameplay. ◊ Built a Bonus Combo system that rewards players with bonus points upon achieving special card combinations, enhancing game engagement. ◊ Integrated REST API handling to fetch and display real-time data from the server within the game UI.	
University Management System (SRM) A comprehensive application to efficiently manage student and faculty information. – Tools & technologies used: Java, Java (Swing), MySQL ◊ Developed a comprehensive University Management Application using Java and Swing to efficiently manage student and faculty information. ◊ Implemented CRUD operations for student and faculty records with a MySQL database backend. ◊ Designed an intuitive GUI using Java Swing for seamless data entry, viewing, and management.	GitHub Repo

Achievements & Certifications

- DCA (Diploma in Computer Application) – Completed.
- Certification of Android Developer Virtual Internship (AICTE-Eduskills).
- HackerRank Java Basic Certificate.
